SKILLS

- Angular
- JavaScript
- ReactJs
- Problem-solving
- Product Development
- UI Automation
- Html
- CSS
- Typescript
- Jasmine
- Karma
- Playwright
- Unit test
- RxJs
- NgRx
- Aws
- ES6
- Node
- Git
- Cordova
- Design Pattern
- OOPS
- REST APIs
- GraphQL
- Express.JS
- JIRA

EXPERIENCE

Global Logic India Pvt Ltd – Software Engineer

June 2022 - Present

- Lead the development of high-impact, visually engaging web applications by combining **advanced functionality with effective design patterns**. This resulted in a 25% increase in user retention and a 20% decrease in bounce rate.
- Managed the frontend development of complex, high-profile projects for Ericsson's networking division, **using Angular, NgRx Store, and GraphQL** to create scalable and efficient solutions. By applying modern design patterns and strong skills in HTML, CSS, and JavaScript, I improved the user experience, leading to a 40% increase in user engagement.

Appinventiv Technologies

Sep 2021 – June 2022

- Developed high-level web applications using Angular, JavaScript, and Typescript and designed and implemented a food delivery web admin platform.
- Created a nursing care web application.
- Built **scalable and maintainable** front-end architectures.
- Implemented **state management solutions** and optimized performance.
- Conducted **unit testing using Jasmine and Karma**.
- Debugged and resolved complex issues.
- Collaborated with cross-functional teams to deliver cohesive applications.
- **Integrated APIs and managed data flow** between the front end and back end.

Ginger Webs Pvt. Ltd

Jan 2020 – Sep 2021

- **Lead the development of the Allen Career Institute Application**, implementing key features such as digital learning modules, real-time news and notifications, and comprehensive student performance tracking. Ensured that students had seamless access to video lectures and downloadable study materials through both **web and mobile platforms**.
- **Designed and implemented hybrid mobile and web applications** for the Allen Career Institute, integrating features such as digital learning modules, real-time notifications, and student performance tracking. Built scalable and maintainable front-end architectures.

PROJECTS

Digital Experience Platform

- The Ericsson Digital Experience Platform seems robust and well-designed to enhance customer interactions. Here's a summary of the key features:
- **Digital Context-Aware Journeys**: Offers pre-configured, digital customer journeys for tasks like recharge, voucher top-ups, and balance adjustments, making implementation faster and more efficient.
- **Modern, Extensible UI Framework**: Provides a responsive design that can be customized to meet the specific needs of different operators, ensuring a tailored user experience.
- **Enhanced CSR Toolbox**: Includes a web portal that improves the digital experience for customer service representatives, making it easier for them to manage interactions across various segments.
- **360-Degree Customer View**: Gives the customer care team a comprehensive view of each subscriber, enabling more personalized and effective service.
- **Technology Used**: Angular , Ngrx, rxjs , Angular Material , java.

BOS AI

- BOS AI Portal provides a comprehensive view of invoices generated with specific sequences and any anomalies present within them.
- **Invoice Summary Views**: Presents invoice details in both card view and table format, covering aspects such as risk level, anomalies, sequence, and bill cycle generation date.
- **Detailed Bill Cycle Page**: Displays in-depth information for each bill cycle ID, including customer details, types of anomalies, and key financial metrics like total revenue, revenue at risk, invoice at risk, and amount.
- **Export Functionality**: Allows users to export data in CSV and JSON formats.
- **History Chart**: Features a line chart showing historical data for the last three months.
- **Technology Used**: HTML, CSS, JS, , ReactJS , GraphQL , java

Barakah Food Delivery App

A food delivery app that enables users to order and purchase meals at discounted prices.

- **Restaurant Management**: Tools for managing restaurant operations.
- **Order Tracking**: Real-time monitoring and management of orders.
- **Payment Management**: Comprehensive handling of payment transactions.
- **Amazon Payment Gateway**: For secure and reliable payment processing.
- **Apple Pay**: Integrated via JavaScript API for a seamless checkout experience.
- **Technology Used**: HTML, CSS, JS, , Angularjs , web socket client

VCH ACT.

- This was a web app for creating accessible information, tools and articles about mental health services
- Developed different data models on Strapi for creating articles, posts, and training materials.
- Developed queries on Node.js for querying the Strapi data.
- Implemented user login and user session using Azure MSAL.
- **Technology Used :-** Angular, Node.js, Strapi.
- Link : [Project link](#)

ALLEN CSAT

- The aim of the project is to provide educational facilities to students.
- The website and mobile app feature various modules including:
  - Digital learning
  - News
  - Notifications
  - Student performance tracking
- Students can easily access video notes and download the latest lecture notes
- **Technology Used :-** AngularJs, Cordova ,Ionic , java, Javascript
